OMNI SYSTEMS // PROJECT SPECIFICATION AGREEMENT

DOCUMENT ID: SPEC-2026-X89 | STATUS: APPROVED

1. Executive Overview & Scope of Services

This Statement of Work (SOW) outlines the deployment parameters for the Omni.Sys Client-Side Utility Platform. The project encompasses client-side optical character recognition, ISO/IEC 18004 standardized matrix synthesis, and cross-format multi-media transcoding.

2. Architecture & Data Security Mandates

All cryptographic transformations, OCR pipeline evaluations, and document conversions must execute strictly within browser sandbox memory. Under no circumstances shall user source images, confidential PDF documents, or contact attributes be transmitted across public network sockets.

3. Deliverable Milestones

- Milestone Alpha: Browser-local Tesseract OCR engine with heuristic attribute parser.
- Milestone Beta: High-density vector SVG and 1024px PNG matrix generation engine.
- Milestone Gamma: PDF-to-DOCX word extraction pipeline and images-to-PDF compiler.
- Milestone Delta: Industrial Swiss TAKO utility interface styling and responsive hardening.

4. Acceptance and Execution Signatures

By executing this agreement, both parties verify that the technical specifications detailed herein meet all enterprise compliance standards.
